

Many wildfires have started by campfires that got away.

Before you light a campfire, consider these helpful tips:

- √ Clear vegetation away from fire ring. Help kids keep burning sticks and twigs in the fire.
- √ Keep plenty of water handy and have a shovel for throwing soil on the fire if it gets out of control.
- √ Drown campfires with water. Make sure all embers, sticks, and coals are covered with water. Stir thoroughly to ensure all material is wet.
